

Allscripts MyWay 8.4 is GA

We're VERY pleased to announce the general availability of the latest release of Allscripts MyWay 8.4 effective March 12, 2010. This version provides new functionality that helps clients manage their practice, EHR, and claims management at top efficiency.

What's New?

MyWay 8.4 provides new and expanded capabilities, including faxing enhancements, claim resubmission codes, superbill reversals, procedure productivity, insurance forms and electronic claims, patient remark delay option, a notes text box for case management, and Welch Allyn integration.

Software Enhancements—Practice Management

Faxing – Faxing is available from additional screens, making faxing of generated documents easier.

Claim Enhancements – Resubmission Codes changes and forms enhancements

Superbill Reversals – A superbill in a completed batch can now be reversed without updating the close date. The superbill reversals now appear as the appropriate positive or negative unit on the Procedure Productivity.

Software Enhancements—Electronic Health Record

Patient Remark Delay Option – A new option, Patient Remark Delay, was added to the Defaults tab of the User Options window.

Notes Text Box for Case Management – A label, Notes, was added to the text box in the Flow Sheet module on the Case Mgmt tab in Full Note Composer and up to 255 characters of free-text information can be entered.

Technology upgrade for Welch Allyn Spot Vital Signs Devices – Allscripts MyWay now supports the latest Welch Allyn® Connectivity SDK 2.2 for Spot Vital Signs devices enabling both USB (Welch Allyn® Spot Vital Signs® LXi series) and serial port connectivity.

Technology upgrade for Welch Allyn ECG (Electrocardiograph) and Spirometer Devices – Allscripts MyWay now supports the latest Welch Allyn® CardioPerfect™ Workstation software (version 1.6.2) for ECG and Spirometer devices enabling both USB and serial port connectivity.

Why is this big news?

- › Allscripts MyWay 8.4 is a focused release addressing key enhancements to MyWay PM and EHR functionalities, customer reported issues, and technology upgrades.
- › The release is already live at 13 customer sites as part of the early adopter process.
- › Improves our competitive position in the EHR-PM marketplace
