Northwest Arkansas Center for Plastic Surgery chooses Rock Solid Solutions to Streamline Technology.
Rock Solid Solutions helps Dr. Heath Stacey open new practice in Northwest Arkansas

FAYETTEVILLE, AR., July 1, 2010 –Upon moving to Northwest Arkansas and opening his new practice, Dr Heath Stacey turned to Rock Solid Solutions to help with his Technology Design, Network Cabling, Network Configuration, Phone System, Phone Lines and Disaster Recovery needs.

When Dr Heath Stacey decided to move to the Northwest Arkansas area from Madison, WI, he needed someone to prepare his new office for information technology. He chose Rock Solid Solutions because of their exceptional service. With Rock Solid Solutions' one call technology team, Dr. Stacey was able to leave the headache of preparing his new office to Rock Solid Solutions. They handled the entire design and network cabling for the office, installed a Talkswitch phone system with Polycom phones throughout the office and setup his PCs and server for his EMR software. They were even able to help with the setup of the phone lines and internet connectivity contracts, which were a couple more things Dr. Stacey did not have to worry about.

Rock Solid Solutions also put in place disaster recovery, anti-virus and setup a backup system for Dr. Stacey to protect all of this electronic information.

About Rock Solid Solutions

Rock Solid Solutions is truly a one-call technology team. With more than 25 years of combined experience, the Rock Solid Solutions team has consulted and worked closely with clinics, hospitals, physicians and dentists. Additionally, Rock Solid Solutions provides comprehensive IT services including computer and network services, telecommunications systems and cabling and audiovisual (AV) solutions and consulting.
